(54) BATHING AGENT COMPOSITION

(57)Abstract:

PURPOSE: To obtain the subject composition capable of easily and effectively preventing body smell development with low germicide application levels without the need of any burdensome operation such as coating or spraying in taking a bath.

CONSTITUTION: This bathing agent composition comprises a combination of a carbon dioxide-generating ingredient with a germicide selected from phenolic germicides (esp. pref. isopropylmethylphenol or p-chloro-m-cresol) and cationic germicides (esp. pref. benzalkonium chloride, benzethonium chloride or cetylpyridinium chloride) and pref. additionally, a cationized polymer (esp. pref. cationized cellulose, cationized starch or cationized dextran). It is preferable that this composition be used so that the concentration of the germicide in bath water stand at 0.1-100 wt.ppm.
